In order to contribute to the cynipid fauna (Hymenoptera: Cynipidae) of Turkey, this study carried out in 2015. Gall specimens were collected from Uşak. According to previous faunistic studies, cynipid fauna of Uşak was represented by 15 species belonging to 7 genera. In result of the study, a new species was recorded as a new record (*Andricus istvani* Melika, 2008) the first time for Turkish fauna. So, cynipid richness of Turkey was contributed with a new record.

Keywords: Cynipidae, Cynipini, *Andricus*, gall wasp, Uşak.
